| S&P 500 | 13.65% | 13.65% | 9.50% | 13.51% | 10.07% |

As of the latest prospectus, the gross expense ratio for the Fund's Class I, Class INV, Class A, and Class C is 2.89%, 3.18%, 2.90%, and 3.80%, net expense ratio is 2.07%, 2.42%, 2.42%, and 3.07% and net expense ratio excluding acquired fund fees and expenses and dividend and interest expenses on short sales is 1.60%, 1.95%, 1.95%, 2.60%, respectively.

The performance data quoted represents past performance. Past performance does not guarantee future results and current performance may be lower or higher than the performance quoted. Performance reflects the deduction of management fees and other applicable expenses. For the most current month-end performance data please call 1-855-425-6844.

Morningstar Category Averages are designed to represent the average return of funds within their category over time. Morningstar creates a category average daily total return index series, as well as monthly, quarterly, and annual averages of return and non-return data. Morningstar Category Averages are equal-weighted category returns. The calculation is simply the average of the returns for all the funds in a given category. The standard average calculation is based on constituents of the category at the end of the period.

¹ The performance data quoted for periods prior to September 30, 2015 is that of an unregistered investment fund (the "Predecessor Fund") that was managed by the Adviser and was reorganized into the Fund as of the date the Fund commenced investment operations. The Predecessor Fund was not a registered mutual fund and therefore was not subject to the same investment and tax restrictions as the Fund. Performance information reflects all fees and expenses incurred by the Predecessor Fund, and has not been adjusted to reflect Fund expenses. If it had been so adjusted, the Predecessor Fund's performance might have been higher or lower for a given period depending on the amount of such expenses incurred for any given period. Performance information for Class Inv and Class C have been adjusted to reflect 12b-1 fees and shareholder services fees, as applicable. The Predecessor Fund commenced operations on January 2, 2015.

² Total return for periods greater than one year are annualized.

³ Effective June 29, 2018, Class A shares of the Clough Global Long/Short Fund were added as a new available share class. Performance for Class A Shares prior to June 29, 2018 reflects the historical performance of the respective Fund's Investor Class Shares, calculated using the fees and expense of Class A Shares.

Overall Morningstar Rating™

★★★★ 4-Star Overall Morningstar Rating™

For Class I as of 3/31/19 among 205 Long-Short Equity Funds based off of risk adjusted return. Other share classes may have varying ratings.

2019 Morningstar, Inc. All Rights Reserved. The information contained herein: (1) is proprietary to Morningstar; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results. For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating™ based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly performance (including the effects of sales charges, loads, and redemption fees), placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star. (Each share class is counted as a fraction of one fund within this scale and rated separately, which may cause slight variations in the distribution percentages.) The Overall Morningstar Rating™ for a fund is derived from a weighted average of the performance figures associated with its three-, five- and ten-year (if applicable) Morningstar Rating™ metrics. As of March 31, 2019, the Clough Global Long/Short Fund was rated against the following numbers of Long-Short Equity Funds over the following time periods: 205 funds in the last three years. With respect to these Long-Short Equity Funds, Investor Class Shares received a Morningstar Rating™ of 3 stars for the overall and three-year period; C Shares received a Morningstar Rating™ of 3 stars for the overall and three-year period; and I Shares received a Morningstar Rating™ of 4 stars for the overall and three-year period. Other classes may have different performance characteristics. Past performance is no guarantee of future results. ©2019 Morningstar, Inc. All Rights Reserved.

broadly diversified or narrowly focused on specific sectors and can range broadly in terms of levels of net exposure, leverage employed, holding period, concentrations of market capitalizations and valuation ranges of typical portfolios. The HFRI family of indices reserves the right to revise historical performance data for a period of up to four months following the as of date. The performance shown was calculated using current, available data at the time of publication, but is subject to change outside of the control of the Fund and its affiliates. An investor cannot invest directly in an index.

Morningstar Equity Long/Short Category Average: Long/short portfolios hold sizeable stakes in both long and short positions in equities, exchange traded funds, and related derivatives. Some funds that fall into this category will shift their exposure to long and short positions depending on their macro outlook or the opportunities they uncover through bottom-up research. At least 75% of the assets are in equity securities or derivatives, and funds in the category will typically have beta values to relevant benchmarks of between 0.3 and 0.8 during a three-year period. Performance figures are a representation of peer group averages.

S&P 500: The Standard & Poor's composite index of 500 stocks, a widely recognized, unmanaged index of common stock prices. Index performance does not reflect fund performance. An investor cannot invest directly in an index.

Standard deviation: An annual statistical measure of the historical volatility, measure of the extent to which returns are spread around their average. A high standard deviation implies greater volatility.

Alpha: A measure of performance on a risk-adjusted basis.

Beta: A measure of the volatility, or systematic risk, of a security or a portfolio in comparison to the market as a whole. The beta of the market is 1.00 by definition. A beta above 1 is more volatile than the overall market, while a beta below 1 is less volatile.

Sharpe ratio: A measure that indicates the average return minus the risk-free return divided by the standard deviation of return on an investment.

R-Squared: A statistical measure that represents the percentage of a fund or security's movements that can be explained by movements in a benchmark index.
